CALIFORNIA FAMILY CODE 7613(a) CONSENT CALIFORNIA DOMESTIC PARTNERS

_____ (gestational mother) and _____ (domestic partner) are both currently residing as domestic partners with the State of California. This couple is receiving sperm from this facility with the intent, purpose, and agreement, that both shall be equal legal parents to any child conceived with this sperm, that both have equal rights and responsibilities that a natural mother bears toward her child. Both of us understand that we are obligated to seek legal advice from our own attorney about our parental rights. This facility cannot and is not offering legal advice as to any parental rights or obligations regarding any offspring of this reproductive procedure. Nevertheless, this couple intends that **Family Code 7613(a)** quoted below, apply to them, as provided in **The Domestic Partner Rights and Responsibilities Act, (AB 205)** effective as of January 1, 2005. This law provides that *"the rights and obligations of registered domestic partners with respect to a child of either of them shall be the same as those of spouses"*.

It is not a requirement that Domestic partners be registered in order to sign this document. The purpose of this document is to show the intent of the parties to share legal rights and responsibilities to a child conceived with sperm obtained from this facility.

7613. (a) If, under the supervision of a licensed physician and surgeon and with the consent of her husband, a wife is inseminated artificially with semen donated by a man not her husband, the husband is treated in law as if he were the natural father of a child thereby conceived. The husband's consent must be in writing and signed by him and his wife. The physician and surgeon shall certify their signatures and the date of the insemination, and retain the husband's consent as part of the medical record, where it shall be kept confidential and in a sealed file. However, the physician and surgeon's failure to do so does not affect the father and child relationship. All papers and records pertaining to the insemination, whether part of the permanent record of a court or of a file held by the supervising physician and surgeon or elsewhere, are subject to inspection only upon an order of the court for good cause shown.

Furthermore, the signatories below agree that this facility shall be permitted to produce documentation of the consent to facilitate an adoption, or upon request by the subject child, in accordance with the ordinary practices of this facility.
